CONTENTS

1	Functions	1
1.1	Intro To Functions	1
1.2	Evaluating Functions	3
1.2.1	Difference Quotient	4
1.3	Finding Domains	5
1.3.1	The Problem Areas	5
1.4	Operations Of Functions	7
1.5	The Vertical Line Test	8
1.6	Features of Graphs Points, Domain, Range	9
1.7	Properties of Functions: Even or Odd	11
1.8	Properties of Functions: Increasing or Decreasing	13
1.9	Properties of Functions: Extremas	15
1.10	Average Rate of Change	16
1.11	Piece-wise Functions	17
1.12	Important Functions	19

1.12 Important Functions

Example 1.30 (Even). All of the examples have the point $(0,0)$ $(1,1)$ $(-1,-1)$ except for the $f(x) = b$ which is just a constant value and the $f(x) = \sqrt{x}$ function which can't have a negative input ($x \geq 0$).

1.

$$f(x) = b$$

For this example $b = 1$

2.

$$f(x) = x^2$$

3.

$$f(x) = |x|$$

4.

$$f(x) = \sqrt{x}$$

Example 1.31 (Odd). All of the examples have the point $(0,0)$ $(1,1)$ $(-1,-1)$ except for the $f(x) = \frac{1}{x}$ function which doesn't have the $(0,0)$ point.

$$f(x) = x$$

$$f(x) = x^3$$

$$f(x) = \sqrt[3]{x}$$

$$f(x) = \frac{1}{x}$$
